Welcome!

vivo spa® has fully dedicated itself to the world of moving water. With a lot of passion for you and your well-being. We would like to thank you for your interest and wish you great joy and inspiration with this catalogue.

*Best wellness-wishes
your vivo spa® team*

vivo spa®

philosophy

„Time we take is time giving us something in return.“ Ernst Ferstl

Taking time for yourself. Taking a deep breath. Leaning back. Arriving.

Moments of calmness are so valuable and yet rarely facilitated. Moments in which the here and now is more important than anything else. No questions being asked, no doubts arising, no compromises being made. Giving oneself the best possible treatment.

We are truly convinced that these aspects are the key for long-lasting wellbeing. It is our philosophy and our passion to support you in the best way possible. Cordially, we would like to invite you. Enjoy your time. You deserve it.

WaterFIT refresh life

Joyful Swim Spa moments.

Leave everyday life behind, take a deep breath and refresh. Any time, no matter when or at what time of year.

Do something good for your body and enjoy pure relaxation moments in your Swim Spa. Celebrate your vivo spa® moment.

Close your eyes, regain energy. Enjoy life.

vivo spa®

Swimming whenever you want. 365 days a year.

Water*FIT*

WaterFIT active & relaxed

Finding a balance between exercise and relaxation is often a challenge in everyday life. Yet it is essential for our well-being to create a healthy balance here. No matter what you're in the mood for – whether it's swimming a few "laps", completing an aqua fitness program or simply relaxing in peace and quiet – our WaterFit Swim Spas offer you what you need right now. Right at your home – comfortable and uncomplicated!

WaterFIT swimming

Swimming is good for you – and that's exactly what our WaterFit Swim Spas are optimized for. Whether you're looking to power through the front crawl or prefer a more gentle style of swimming, decide for yourself which model suits you best. Our RiverStream^{PRO} counter-current systems with exclusive LED lighting are infinitely adjustable and can be activated individually, so you can quickly and easily adapt them to your needs. We hope you enjoy your swim!

WORKOUT – FRONT CRAWL

RELAXED – BREASTSTROKE

MODERATE – BACKSTROKE

vivo spa®

WaterFIT aqua fitness

Anyone who has ever completed an aqua fitness program knows how effective and beneficial it can be to exercise in water, not just swimming.

The natural resistance of the water already has a pleasant training effect. If that's not enough, you can also train with infinitely adjustable counter-current.

Create your own aqua fitness program and train muscles, connective tissue and posture in a way that is easy on the joints. Our WaterFit models make it possible!

Water*FIT* fun

For "the swim vacation in between": for families with children, the WaterFit Swim Spa is an absolute highlight. Your kids can swim, romp, dive, enjoy ball and water games to their heart's content – there are no limits to their creativity! You can teach your little ones to swim in a playful and safe way and get them used to the water with lots of fun and joy.

WaterFIT counter-current

DESIGNED TO INSPIRE - WITHOUT COMPROMISES.

With the RiverStream^{PRO} counter-current system, you can adjust the strength of each individual water flow through a regulator continuously and adapt to your needs. Choose from five different height positions the appropriate level for swimming or fitness program.

vivo spa[®]

PERFORMANCE

MP Swim^{PRO}

- ▶ easy and quick settings
- ▶ individually configurable
- ▶ High dynamics – gentle swimming to vigorous workout

EXPERIENCE

Water FIT

- ▶ variable swimming strokes possible
- ▶ wide range of aqua fitness options
- ▶ comfort functions
- ▶ lit RiverStream

WATER FLOW

FreeFloat

- ▶ Optimizing the water circulation
- ▶ turbulence-free circulation
- ▶ extra-wide water flow

Through the optimized interplay of performance, experience and water flow, we have a unique system created that is completely convincing.

An extra-wide water flow, continuously adjustable in strength, adjustable in height: the RiverStream PRO counter-current is everything but standard. Nevertheless, the counter-current system with exclusive LED lighting is installed as standard in all vivo spa® Swim Spa models of the WaterFit series.

MP Swim

The MP Swim System is suitable for recreational swimmers and amateur athletes. It provides optimal water flow, which is best suited for breaststroke, backstroke and fitness training in the water.

MP Swim^{PRO}

For serious swimmers and athletes we recommend the MP Swim^{PRO} system. It guarantees an even stronger counter-current that will drive you to peak performance.

SWIMMING STYLE

MODEL

relaxed

Gently start the morning or end the evening.

Water FIT 1

moderate

Stimulate your cardiac system and stay at a continuous level for as long as possible.

Water FIT 2

Water FIT 3

workout

Shorter, but intensive "Power- Intervals" – ideally suited for ambitious swimmers and athletes.

Water FIT 4

Water FIT 5

SUPERB WATER FLOW.

The unique design of our Swim Spas and the FreeFloat system causes the water flow to be directed back along the bottom and sides outside of the current flow. This reduces turbulence, provides smoother water flow and a better swimming experience.

vivo spa®

WaterFIT hydrotherapy

vivo spa®

"LEARN ABOUT THE WATER PROPERLY, AND IT WILL ALWAYS BE A FRIEND TO RELY ON."

SEBASTIAN KNEIPP

The diversity of water fascinates us again and again. It is life-giving and provides vitality, can be gentle and powerful at the same time. Water can also convey security and comforting warmth. And because of this combination water becomes a unique massage medium. Whether stimulatingly rotating to loosen muscle groups, intensively targeted to relieve specific tensions or gently pulsating to harmonize the entire body – the possibilities of relaxation

and regeneration with water are manifold. The same goes for the positive effects on your physical and mental well-being: hydrotherapy has been proven to lower blood pressure and muscle tonus, relieve joints and muscles and also contributes to inner serenity. In this sense: We wish you a lot of joy and pleasure while bathing in your new vivo spa® Swim Spa!

Effect of a hydromassage

ADVANTAGES** for the **BODY

- ▶ releases tensions
- ▶ increased freedom of movement in the water
- ▶ relaxes and reliefs of the entire musculoskeletal system and mobility apparatus
- ▶ reduces of the tonus in connective tissues and muscles
- ▶ supports mobility of joints and body
- ▶ acitvates metabolism and stimulates blood
- ▶ circulation in connective tissue and fascia
- ▶ regeneration after physical exertion and exhaustion

BENEFITS** for the **MIND

Regeneration after mental effort and exhaustion.

- ▶ improvement of the general well-being
- ▶ calming of the autonomic nervous system
- ▶ reduction of stress
- ▶ relief of nervous complaints
- ▶ leep-inducing when used before bedtime

WaterFIT massage jets

DEVELOPED FOR COMPLETE RELAXATION. INDIVIDUALLY ADJUSTABLE. OPTIMIZED FOR EVERY BODY ZONE.

DrivePro Air Jet

Perfectly suitable for aromatherapy and a bubbling effect.

DrivePro SX Spin Jet

Gently pulsating. Perfectly convenient for smaller areas such as shoulders, wrists and hands.

DrivePro SX Rotational Jet

Invigorating rotating effects. Specially developed for smaller muscles.

DrivePro SX S-Rotate Jet

Rotating movements for a relaxing hydrotherapy. Sparkling effect.

DrivePro SX Direct Jet

Intense and individually adjustable. A spot massage to ease muscle tension.

DrivePro MX Rotational Jet

Invigorating rotating effects. Specially developed for smaller muscles.

DrivePro LX M-Intense Jet

Spiral movements with an increased air- and waterflow. Massaging and invigorating effect.

DrivePro LX Direct Jet

Powerful and targeted. Deep relaxation for tired muscle groups.

DrivePro LX Rotational Jet

Unique rotating massage. Intense hydrotherapy for shoulders, back, calves and feet.

OUR SPIRAL MASSAGE EFFECT WITH DEEP MASSAGE EFFECT PROVIDES INCOMPARABLE MASSAGE RESULTS.

3D^{PRO} Single

For medium-sized muscle areas and reflex zones.

3D^{PRO} Double

For larger areas of muscles and body.

Massage effects with a spiral structure are perceived as particularly pleasant and deeply effective.

For this reason, we have equipped selected DrivePro jets with specially developed 3D PRO flow technology for a hydromassage with the greatest possible lasting effect.

WaterFIT ergonomics

The acrylic shape of a vivo spa® Swim Spa is formed by hand on the clay model in elaborate processes. A team of experts, consisting of scientists and orthopedists, takes care of the ergonomically comfortable seating and lying surfaces during the molding process in order to provide you with the best possible full-body therapy. At the same time, every single model is characterized by individual massage areas and a great feeling of space.

massage area WaterFit 5

WaterFIT color therapy

Luminate COLOR

ADAPTS PERFECTLY TO YOUR MOOD: SENSUOUS
HARMONY FOR A SPECIAL FEEL-GOOD ATMOSPHERE.

Few things are as fascinating as the interaction of light and water. Pleasant colors give your vivo spa® outdoor Swim Spa a special atmosphere and create a cosy feel-good environment. Simply choose from various light modes: Whether as single color or infinitely changing colors: the vivo spa® colour light therapy creates the right atmosphere and your Swim Spa is guaranteed to shine!

WaterFIT Ecology & Efficiency

ECO^{PRO} PROVIDES AN ECOLOGICALLY SUSTAINABLE SPA EXPERIENCE WITH PERFECTLY MATCHED COMPONENTS.

...for efficient counter-current flow.

- ▶ Powerful and economical at the same time: With our counter-current pumps we have realized a very high efficiency while reducing energy costs.

WATER

...for efficient cleaning of the water.

- ▶ water-saving due to reduced replacement intervals.
- ▶ reduced addition of water additives.
- ▶ no addition of chlorine necessary.

HEATER

...for efficient heating of the water.

- ▶ integrated M8 Green Technology ensures maximum energy saving
- ▶ improved corrosion resistance
- ▶ patented software system for intelligent heating
- ▶ durable and reliable

PERFORMANCE

...for an efficient massage.

- ▶ powerful and economic at the same time
- ▶ very high efficiency
- ▶ Reduction in energy costs

CONTROL

...for efficient control.

- ▶ minimizes energy consumption
- ▶ increases the durability of the technical components.
- ▶ continuous pumping performance with high energy efficiency.

INSULATION

...ensures that the water is kept warm efficiently.

- ▶ reduces heat losses to a minimum.
- ▶ pleasantly warm Swim Spa experience even at low temperatures.

Timeless elegance. Stylish appearance. Perfect luxury.

vivo spa®

WaterFIT Insulation & Thermo Cover

NEWLY DEVELOPED: ISOTEC^{PRO} - ENSURES THE BEST POSSIBLE ENERGY BALANCE.

To reduce heat loss as best as possible and thus also keep energy costs as low as possible, all models of the WaterFit series are equipped with the specially developed IsoTec^{PRO} insulation system. Combined with our high-quality ThermGUARD^{PRO} insulation solution – integrated in the ThermoCover and the optional RollCover – and the HEATTec^{PRO} heat control system, you get the best possible efficiency and effectively minimize the operating costs of your vivo spa® Swim Spa.

ThermGUARD^{PRO} BEST COLD PROTECTION: THERMO COVER THE NEW GENERATION.

You will enjoy this cover: The ThermGuard^{PRO} technology was developed in close cooperation with experienced thermal insulation specialists. The special feature of ThermGUARD^{PRO} is the optimal combination of selected components with leading insulation technologies.

ADVANTAGES

- optimal insulation effect
- excellent material resistance
- field-proven components

WaterFIT Roll Cover

Simply good: The newly developed RollCover from vivo spa® with ThermGUARD Pro technology is available as an option and makes it remarkably easy to "open" and "close" your Swim Spa. No matter whether you lower your model into the ground, partially sink it or set it up free standing: with the vivo spa® RollCover, your Swim Spa is optimally protected from external influences, very well insulated and child's play to handle.

SPECIAL FEATURES - VIVO SPA® ROLLCOVER

- ▶ Simple & practical: excellent roll-on and roll-off properties let your Swim Spa "open" and "close" as easy as child's play.
- ▶ Perfect fit in shape & design: integrated support arms ensure optimized drainage of stagnant water
- ▶ High-quality materials: the sheathing made of oxford fabric material is hard-wearing, waterproof, durable and UV-resistant
- ▶ Very good insulation values: due to specially developed interior with high density of XPE foam.

vivo spa®

WaterFIT technology

RELIABLE BRAND COMPONENTS ENSURE A LONG-LASTING AND MONEY-SAVING SPA EXPERIENCE.

MP Swim^{PRO}

For an intense counter-current: MP Swim^{PRO} is our most powerful system and available depending on the model. For gentle to moderate swimming is our equally excellent MP Swim System available.

AirBlow^{PRO}

Air comes into play in the spa area of the WaterFit 2: a high-quality and durable blower ensures a bubbling experience.

MP^{PRO}

Our powerhouse: the MP^{PRO} massage pump provides the unique vivo spa® hydromassage with high pressure..

CircPump^{PRO}

Gets the water moving: the high-quality circulation pump ensures energy-saving circulation.

Ozone^{PRO}

Small device, big effect: the ozone generator ensures fresh, clear and germ-free water.

included in our
Premium Package

WaterFIT electronics & heating

HIGHLY EFFICIENT DREAM TEAM: OUR SPA CONTROL^{PRO} & HEATTEC^{PRO} TECHNOLOGY GUARANTEE AN OUTSTANDING EXCELLENT INTERACTION OF CONTROL AND HEATING. RELIABLE. INNOVATIVE. ENERGY-SAVING.

 **SPAControl^{PRO}** ADVANCED CONTROL MANAGEMENT.

The heart of Swim Spa is the most modern and advanced electronic control system SPA Control^{PRO}. In cooperation with the market leader Balboa from the USA, vivo spa® has created the highest quality components especially for the models of the WaterFit – series. The joint development takes reliability and performance to a new level.

*included in our
Premium Package*

HEAT TEC^{PRO} TECHNOLOGY

- ▶ AI unit for optimal control and tuning of all components

CONNECTORS (HIGH GRADE)

- ▶ prevent leaks

HIGHLY WEATHER-RESISTANT HOUSING

- ▶ effective protection against moisture & corrosion

TITANIUM-TUBUS

- ▶ water-bearing element – extremely corrosion resistant and durable

TITANIUM-HEATER

- ▶ extremely durable and energy-efficient

ARTIFICIAL INTELLIGENCE AND PREMIUM COMPONENTS PERFECTLY COMBINED.

The intelligent HEAT Tec^{PRO} heating system is an integral part of the SPA Control^{PRO} control system. The patented software system offers the following advantages:

- maximum energy savings (M8 Green technology)
- improved durability of technical components
- improved corrosion resistance
- durable and reliable titanium heater

WaterFIT buildup

ROOM SAVING, CONSEQUENTLY MATCHED, EASY TO MAINTAIN: THE INTERIOR OF A VIVO SPA® SWIM SPA.

WaterFIT construction

DuraSTAND^{PRO}

SOLIDLY CONSTRUCTED, OPTIMALLY INTEGRATED. OPTIMALLY TESTED IN PRACTICE.

- ▶ self-supporting premium structure made of stainless steel
- ▶ enormously durable and reliable properties
- ▶ ensures effective weight distribution of the entire acrylic tub
- ▶ triple effect of DuraStand ^{PRO} and the skirting and underbody construction for optimal frame strength & vibration absorption

CONSTRUCTION of the UNDERFLOOR

- ▶ ABS bottom base with exclusive fiberglass reinforcement (depending on model)
- ▶ robust base tray for effective stabilization protection against external influences
- ▶ extremely resilient and resistant

WaterFIT *water treatment*

ENJOY NATURAL WATER TREATMENT AND CRYSTAL CLEAR WATER WITH WATERVILT^{PRO}.

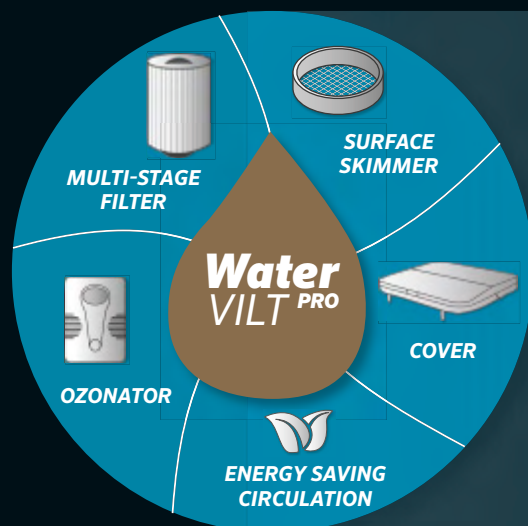

WaterVILT^{PRO} EXCELLENT WATER MANAGEMENT.

included in our
Premium Package

Keeps your vivo spa® guaranteed bacteria-free: the four-stage filter and water management system WaterVILT PRO is specialized to optimize your water effectively and gently. You can abandon the addition of chlorine. Elaborate switching and cleaning cycles simply take care of most of the water maintenance by themselves! The ThermGUARD PRO thermal cover, as a closing element, protects the water from external stresses.

ADVANTAGES

- *simple and uncomplicated water treatment*
- *optimal water quality in a natural way without the addition of chlorine*
- *excellent interaction: effective & energy-saving technologies*
- *automated, self-cleaning filter system*

Ozone^{PRO} EFFECTIVE WATER CLEANING.

Our Ozone^{PRO} generator is a real workhorse: it cleans the water in your vivo spa® in a power-saving and continuous way. And it does that very effectively: the addition of chlorine is not necessary at all. Ozone PRO achieves the same results with very little addition of ozone an extremely high efficiency. Thus, with low emissions, a healthwise harmless, environmentally friendly use is guaranteed.

HYGIENE⁺ COMPREHENSIVE HYGIENE SYSTEM.

The HYGIENE⁺ program is an integral part of our water management and essential to keep your water clear and germ-free. Through the HYGIENE⁺ principle, we have created a particularly effective system that produces a very high degree of water clarity and purity: up to 99.9% of suspended solids, bacteria and germs are effectively eliminated!

***WaterFIT** aromatherapy*

The miraculous effect of fragrant aromas was highly appreciated thousands of years ago in ancient times and the distant Orient.

Even today, the addition of pleasant aromas is still very popular. And not without reason: fragrances awaken in us a feeling of being able to breathe deeply and let go, and open up the space for complete relaxation.

SENSUAL MOMENTS TO BREATHE DEEPLY AND ENJOY. RELAX TO PLEASANT FRAGRANCES AND ARRIVE IN THE HERE AND NOW.

Place the fragrance pearl bag in the aromatherapy container provided. Now it is time to activate the blower and lean back. Thanks to the AirBlow^{PRO} system, the air bubbles will effectively emit the fragrance throughout the spa area (WaterFit 2). You can keep the bag in the container and repeat the application as required by controlling the blower.

Alternatively, for models without AirBlow^{PRO}, you can add the aroma directly to the water. Liquid aroma additives are recommended here, which are added in the middle with the counter-current running for optimum distribution.

popular fragrances

LAVENDER

balancing, soothing,
stress-relieving

EUCALYPTUS

refreshing, invigorat-
ing, strengthening

CLARY SAGE

vitalizing, relaxing, inspiring

CHAMOMILLE

calming, stress-relieving,
